LED INTRODUCTION

1 LED	2 LEDs	3 LEDs	4 LEDs
25%	50%	75%	100%

How to check the power level:

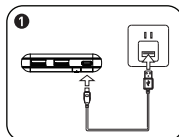

- Power level indicator: this portable powerbank has 4 power level indicators which enable you to check the remaining power conveniently.
- You can check the power level by pressing the power button (1), as shown on page 1.

ADDITIONAL INFORMATION

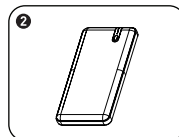

- Do not use the powerbank to charge other devices and charge the powerbank at the same time.
- If you are not using the powerbank, we suggested to disconnect the external AC power adapter or DC cable from the powerbank.
- If the powerbank's output voltage is lower than the rated voltage / working voltage of your charging device, the device might not charge or get fully charged.
- If the powerbank's output voltage is higher than the rated voltage / working voltage of your charging device, and the management system cannot support such situation. This might overcharge your device, damage the powerbank or possibly damage your device.

2

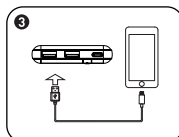

HOW TO USE

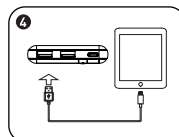

Charge the powerbank with an AC power adapter or PC.

Take the powerbank and your charging cable to charge your device everywhere.

Use the powerbank to charge your mobile phone.

Use the powerbank to charge your tablet.

1) How to charge the powerbank:

If the powerbank is in a low power state, you should charge it with an external AC charger or a PC's USB port. Use the attached USB-A to USB-C cable to charge the powerbank.

2) How to use the powerbank to charge your device(s), taking an Apple iPhone 8 as an example:

- Use the Apple charging cable like the one included with your iPhone.
- Connect the USB connector to the powerbank's USB output and connect the Apple connector to your iPhone.
- The powerbank will charge your device automatically after the device is connected. Power level indicators will turn off after 5 seconds.

3

SAFETY INSTRUCTIONS

- Do not throw the powerbank into fire or try to heat it up. In such situations it might burn, explode or release toxic gas.
- Do not connect the positive and the negative poles directly.
- Do not connect the powerbank's output with the powerbank's input.
- Do not store the powerbank with other metallic or magnetic materials.
- Do not try to open or break the powerbank.
- Do not put the powerbank in water or make it wet.
- Do not use the powerbank if you notice it is leaking, heating up, looks out of shape, starts to smell or shows any other signs of a malfunctioning powerbank.
- Do not use the powerbank at higher temperatures than 60 °C. The recommended ambient temperature is between 15 °C and 25 °C.
- Do not use any chargers other than the charger supplied with the powerbank to charge the powerbank.
